

WANG BOHAN

Shanghai, China | +86 150-2189-3786 | 3077242053@qq.com

EDUCATION

Tongji University

Aug. 2024 – Jun. 2028 (Expected)

B.S. in Financial Mathematics (Double Degree Program) · Shanghai, China

- Relevant Coursework: Stochastic Processes, Econometrics, Financial Derivatives, Mathematical Statistics, Data Structures & Algorithms, Linear Algebra

RESEARCH EXPERIENCE

Global Carbon Market Comprehensive Assessment & Idealized Framework Design

Feb. 2025 – Mar. 2026

Research Assistant · School of Environmental Science and Engineering, Tongji University · Supervisor: Prof. Bin Xu

- Sole remaining team member after initial team withdrawal; independently shouldered all research responsibilities through final project defense.
- Collected, cleaned, and structured large-scale cross-national datasets covering major Emissions Trading Systems (EU ETS, California Cap-and-Trade, China National ETS, RGGI, and others).
- Conducted comparative policy analysis of carbon allowance mechanisms across 10+ economies, evaluating emission-reduction efficiency, market liquidity, and price discovery performance.
- Built a quantitative idealized carbon market framework (Carbon AI) incorporating mathematical modeling and machine learning for carbon price forecasting.
- Authored multiple interim progress reports and the full mid-term review; delivered a clear and well-received final defense presentation before expert reviewers.

INTERNSHIP

Ningxia Bank Head Office

Jan. 2026 – Mar. 2026

Financial Technology Intern · FinTech Department

- Assisted in building an internal AI-powered knowledge base Q&A system using the Dify platform; handled document organization, workflow configuration, and testing optimization.
- Cleaned and structured financial policy documents, credit product materials, and regulatory texts to improve knowledge retrieval accuracy and usability.
- Supported the pilot deployment of AI tools across internal business scenarios, improving employee information query efficiency.

INTELLECTUAL PROPERTY

Invention Patent (Accepted)

2026

"A Method and Equipment for Hierarchical Coordinated Control of Active and Reactive Power in New Energy Stations"

- Application No. 202610462312.7 · National Intellectual Property Administration of China
- Contributed to the algorithm design and simulation verification of the hierarchical active/reactive power coordination scheme; authored the patent application materials.

CAMPUS ACTIVITIES

Tongji University Football Association

Sep. 2024 – Present

Member & National Level-3 Football Referee

- Officiated on-campus match events; responsible for rule interpretation and real-time decision-making under pressure.
- Participated in event organization and coordination, developing strong teamwork and communication skills.

SKILLS & LANGUAGES

Technical: Python, LaTeX, R, Excel (advanced); quantitative modeling, data cleaning & analysis

Languages: Mandarin Chinese (native) | TOEFL overall - 5.0/6.0
